Shows actual number of respondents answering the question, the flattened total. Enables you to judge the reliability of the result.

The graph helps you to quickly drill to the issues. The longer and darker the line the better!

Shows the Difference from your chosen target group, e.g. All respondents from QDP National Benchmark, School from All College, Course from School etc.

Shows the total of "Agree Completely" & "Agree Mostly" as a %. Provides you with a range of scores from the "Rating" to "% of Agreement".

The rating number value 0 to 100 is a weighted percentage and is a statistically valid way of summarising the result of any question. They are ideal for comparison, internal & external benchmarking. They also act as a target tracking distance travelled year on year.
